\$325

- – Provide new theme with Drag & Drop page builder Elementor
- – Create custom product category template & single product page template
- – Remove products from homepage
- – Build Header & Footer for site

**These items will address the following concerns:**

1. I need to incorporate our new logo as a border but the built-in WordPress templates don't do that kind of thing.
2. The categories appearing on the main page is unacceptable. I want a clean main page and they force you to add your categories on there. I just want a single button at the bottom of that first page that is a link to the main shop page and categories can be there.
3. I'd like to have a nicer description area for each one and not having to jam everything including installation instructions in one space but their pre-fab doesn't give me the option.

Complete Store Setup [ OPTION 2 – see notes ]	\$65	20	0%	\$1,300
<ul style="list-style-type: none"> <li>• Our complete store setup includes a custom theme, branded to match your business; with custom category and product pages to fit the specific information needed for your products. We'll build out homepage, legal pages, and products.</li> <li>• </li> <li>• I would also recommend breaking up some of the disclaimers that are on the homepage and putting them throughout the site, where they are relevant so people are more likely to read them.</li> <li>• </li> <li>• We can also create custom forms that will allow you to organize email requests by type (IE... shipping questions, return request, product questions, etc). This could help reduce the amount of phone calls you're currently getting.</li> </ul>				

Subtotal \$1,625.00

Total ? \$1,625.00
